

Caromont Medical Group Signature Log

A copy of this log is to be maintained in the practice administrative files. The log should be updated to reflect the current signature and initials of each individual making entry (physician, NP, PA etc.) into patient records. Clinician signatures must include credentials. Clinician's should sign the log using each variation of their signature. A copy of the Signature log can be sent to Health plans with medical records for audit purposes. Signature logs are not acceptable for Risk Adjustment Data Validation purposes.
